

RUSTlab Lectures Summer Term 2022

Thursdays 14:15 - 15:45 or 16:15 – 17:45 hrs cet

Data Traces

What are data, but traces? Traces of breathing life, of long-lost beings, of the smallest movement or of the largest universes. They are passages from phenomena, events or practices to reading, computing and interpretation. Data translate traces, they sort and infrastructure traces. And data generate their own traces. This term we'll think about data as traces; traces that are inscribed into technology, translated and accumulated.

**The lectures will be on-site in the Universitätstr. 104, Room 201
and on-line: <https://tinyurl.com/RUSTlab>**
